MySkillCoach

A web-based career readiness platform — resume upload · AI skill extraction · gap analysis · readiness score

Vaishnavi Kunapareddy · Ziyan Chen
Mentor: Leili Javadpour

THE PROBLEM

Students Are Lost Without Direction

- Don't know which skills are missing for target careers (e.g. Data Analyst, Business Analyst).
- Platforms like Coursera offer courses — but no personalized gap analysis.
- Random course-taking wastes time & leads to weak job readiness.

MISSION & VISION

A Smarter Path to Career Readiness

Mission: Help students identify skill gaps and follow personalized learning paths to reach their career goals.

Vision: AI-driven recommendations, trackable progress, and human-guided advice — all in one platform.

- AI-Powered
- Data-Driven
- Trackable
- Human-Guided

TARGET AUDIENCE

Who Is It For?

Business Administration
Data / Business Analyst track

Computer Science
Software / Tech career paths

Information Technology
IT & Systems roles

Data Science & MIS
Analytics & management systems

Benefits

- Helps students understand where they stand in relation to their career goals.
- Provides a personalized roadmap for skill development.
- Keeps students aligned with current industry demands, ensuring better employability.
- Reduces guesswork in career planning by offering data-driven insights.

HOW IT WORKS — SYSTEM OVERVIEW

Resume Upload → AI Skill Extraction → Gap Analysis → Readiness Score

- **Create Account & Upload Resume**— student logs in; resume parsed via Affinda / spaCy NLP (no manual entry)
- **AI Extracts Existing Skills**— NLP identifies skills from resume text automatically
- **Select Career Goal**— e.g. Business Analyst, Data Analyst, Financial Analyst
- **Dynamic Skill Requirements**— OpenAI API fetches required skills for that role (no hardcoding)
- **AI Gap Analysis**— compares student skills vs. required; identifies matched & missing skills
- **Readiness Score Calculated**— e.g. 6 of 10 skills matched = 60% ready for selected career goal
- **View Results & Re-run Anytime**— matched strengths, missing skills, recommendations; re-run after updating resume

STEP-BY-STEP FLOW · WEB-BASED PLATFORM · POWERED BY OPENAI + NLP

From Resume Upload to Career Ready

01	02	03	04	05
Create Account	**Upload Resume**	**Select Career Goal**	**AI Fetches Skills**	**Readiness Score**
Login & set profile	Auto skill extraction	e.g. Data Analyst	OpenAI API, no hardcode	% ready + gap report

Step 1–2 — Upload Resume

resume_VZ.pdf ✓ Uploaded | Skills auto-extracted via spaCy NLP

YOUR SKILLS vs REQUIRED (Data Analyst — via OpenAI API)

Skill	Have	Required
Python	Beginner	Mid
SQL	Mid	Mid
Tableau	—	Mid
Statistics	Beginner	Pro

Gap Met | Skill data fetched dynamically via OpenAI API

Step 5 — AI Gap Analysis Result

Powered by Python · spaCy NLP · OpenAI API
